

SAMPLE ANSWER

Admittedly, being a huge part of culture, art assists to shapes our ideas and provide us deeper understanding of emotions. Therefore, creative people can boost us emotionally and change our feelings by music or paintings. Furthermore, to learn about culture and history, it provides a great assistance. Many states show their history through a piece of painting or the way people dance or wear, for a majoriry of people this is the sort of entertainment too. For example, lots of Beethoven's fans listen to his music pieces because they feel relieved and motivated. Thus, art helps to controls our emotions but advancement can not.

Along with this, by watching artistic pieces, people get reflection of spirituality in paintings has a cathartic effect evoking the sentiments of peace and spirtual enlightenment. In addition, culture and mythology are imbided in such art which also articulate the spiritual beleifs of artists. Some works are inspired by chracter of epics like Mahabharata or Ramayana with whom people are emotionally attached. Hence, creativity aids masses to connect with their roots, technology put them for away from reality.

To conclude, the blessings of modern technology in the shape of innovations are serving well but it is a fact that due to human nature, we greatly appriciated artists and their work as these offer great values to the audience in unique ways.
