

## ANSWER

The variations in the consumption of three different fast foods by teenagers of Australia from 1975 to 2000 has been compared in rendered polyline graph.

Overall, it is noticed that Hamburgers and pizza gained the popularity among the junk foods in Australia, whilst youth started to avoid consumption of fish and chips over the given time period.

In 1975, the count of eating of fish and chips was far higher, noticed as 100 times per year, than hamburgers and pizza which was approximately 2 times and 5 times respectively in the same year. Before inclining to 90 times in 1985, the intaking of fish and chips slightly declined to 70 times in 1980. After that, in the same item, there was seen a sharp reduction during 25 years and reached to almost 39 times in 2000.

Next, hamburgers was eaten 80 times by most of the youngsters in 1985. In the last year, they liked to have same amount of hamburgers as that of fish and chips which was accounted for 100 times in 1975. On the other hand, intaking of pizza gradually climbed to above 80 times from 1980 to 1995, however in 2000, steady stage was observed in the pizza consumption.
